RE: Propane carburetion for Tecumseh Model VH-70 engines

Starting at Paver Serial # F-10027-N-8, all Tecumseh Model VH-70 engines used by Layton Manufacturing Co. will be equipped with a new style propane carburetion. The new style system incorporates a dual needle valve assembly, which provides independent adjustment for "high speed" and "idle speed" fuel mixtures. Using this system will allow finer tuning of the engine which creates a smoother running and more efficient engine.

This new carburetion is available as Retro-Kit, for use on any prior Tecumseh Model VH-70 engine. Retro-Kit part# 525-303 has a list price of \$86.25 and can be installed in approx. ½ hour.

Retro-Kit part number 525-303 consists of:

- 1ea. New intake manifold, with "idle" fuel hose fitting.
- 1ea. New Adapter Block, with Venturi.
- 1ea. New dual Fuel Mix Valve assembly.
- 1ea. "idle" fuel hose.
- 2ea. Hose Clamps
- All Necessary Gaskets

Please pass this information along to your parts department.
